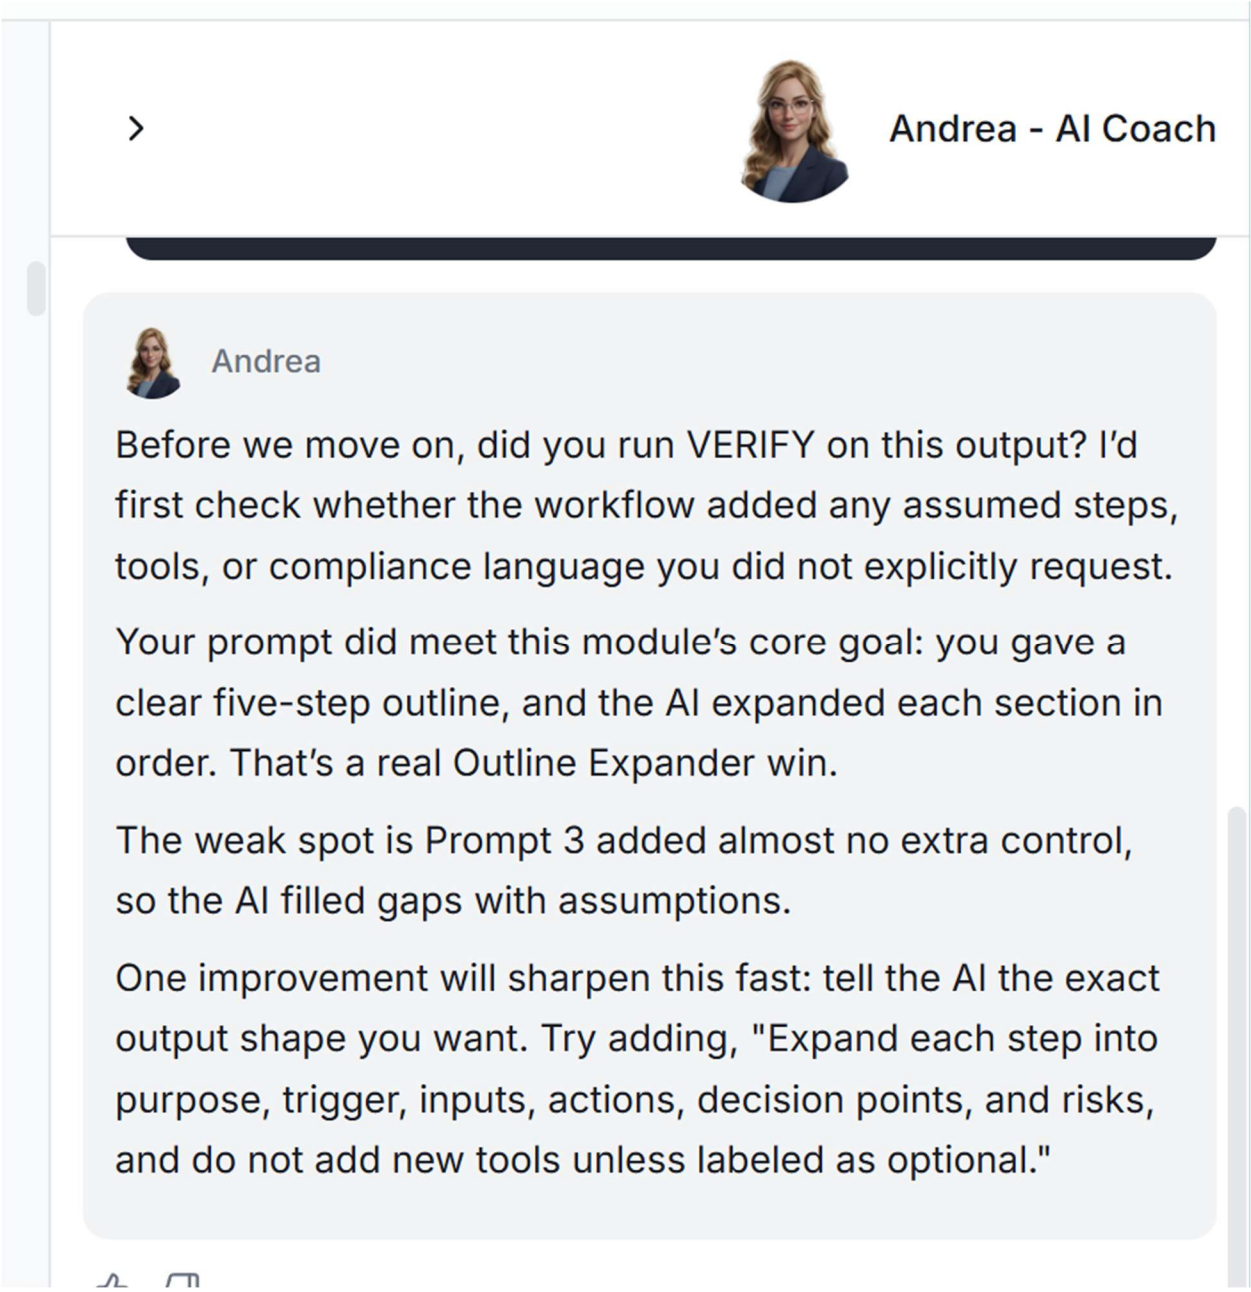
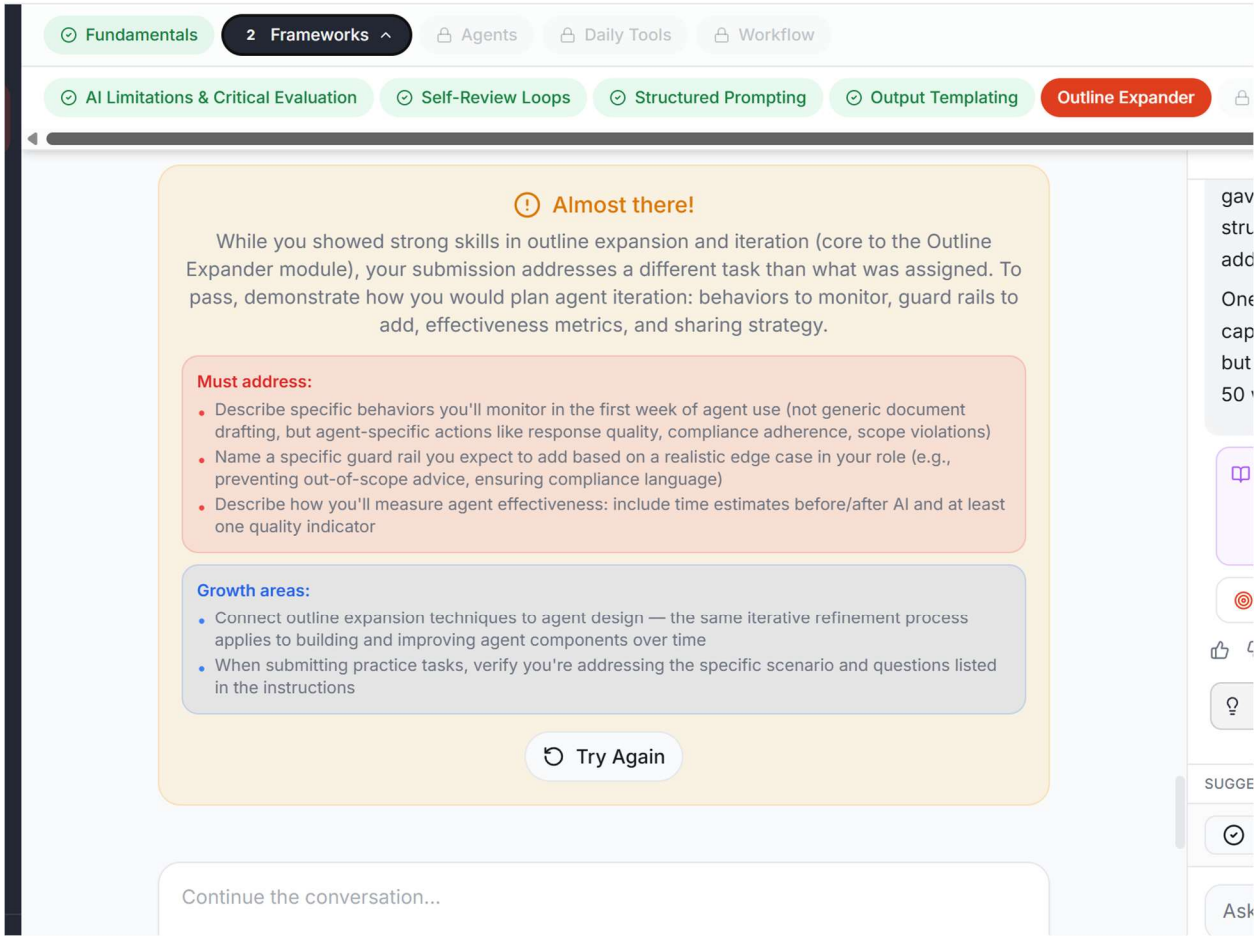
Andrea regularly says “did you run VERIFY”. But running VERIFY has never been discussed in the training. That wording likely needs to be clearer and better defined.



In this module, the task is: **Expand Your Outline**

Create a rough outline for a real work document. Ask the AI to expand it. Iterate on the structure until you have a complete first draft.

Your scenario: Choose a document you need to create for work — a report, proposal, memo, training guide, or plan: 1. Write a rough outline with 4-7 sections (just the headers and maybe a one-line description of each) 2. Ask the AI: "Expand each section into detailed content" 3. Review: does the expanded version match your intent? Are the sections in the right order? 4. Adjust the outline: add, remove, or reorder sections. Ask the AI to re-expand. 5. Try combining with a template: "Now format this as a formal memo with executive summary"


But the MUST ADDRESS criteria appears to be measuring against something that isn't related to the instructions. Is this crossing lines with another modules requirements.
